

## **IT/Technical 2024 Annual Report**

The IT/Technical Team maintains and operates the church's audio and visual equipment for services and maintains church computers. In addition, we maintain the electronic programs for building security systems (with Alarm.com and Axis Entry System), and electronic program for furnaces (with RC Studio), which ensures building safety and comfort for renters and congregation.

One of our main tasks is to provide technical support for worship services. Our team of volunteers provide technical support for the livestreaming and Audio/PowerPoint operations of the Sunday and special worship services. In 2024, we have provided technical support for 55 worship services, and additional support for numerous memorial services, community engagement concerts and functions.

The IT/Technical team consists of 11 members. They are Sam Boehner, Karen Clark, Rob Glenn, Bob Krueckl, Louise Johnston, Jiemei Li, Ron Norman, Jayda Perry, Bill Walker, with new added members Sue Christensen and Melissa Nagy. We can always use people interested in helping and are savvy with computers / sound equipment. We can train anyone who may be interested and available during the Sunday services.

At the end of the year, Bob Krueckl will be retiring from the IT/Technical team, and we want to send him our appreciation and a big thank you!

*Respectfully submitted,*

*Rob Glenn, IT/Technical Coordinator*
