Hi Martin Petitclerc,

Hi Caroline Ouellet,

I would like to take the time to thank you both and your team of professional dent repairers. In our Collision Center it is the most important thing is to get our customers the repair that is needed to keep the vehicle in the best condition for as long as they own it. We tell our customers, the original paint from the factory should be kept as long as possible. And if buffing or dent removal is possible it is the best repair and will reduce cost to the client. After working with your company I was so impressed with the repairs your staff did it was amazing. The body Technicians could not believe their eyes how well the dent removal was. Your team made us all believers.

Warm regards Dave Baker (Collision Manager)
