

ANTI-FOAM 20

“20% Active Defoamer”

- Superior results with even the toughest foaming tank mixes.
- Twice the concentration of most other brands.
- The most reliable choice for growers since 1980.
- Compatible with most all spray tank mixes.
- Prevents foam when added first to the spray tank mix.
- Even effective when diluted and sprayed directly on existing foam.

Principle Functioning Agents:
Dimethylpolysiloxane.
TOTAL Principle Functioning Agents.....20%
Constituents ineffective as a spray adjuvant.....80%
Exempt from tolerance under EPA 40 CFR 180.1001 (c).

Anti-Foam 20 helps reduce foam which decreases the preparation time of tank mixing as it eliminates foam build up and foaming over.

DIRECTIONS FOR USE:
To Prevent Foam: Add 1/2 to 1 ounce per 100 gallons of water BEFORE adding chemicals or adjuvants.

To Eliminate Existing Foam: Blend 1 part Anti-Foam 20 to 7 parts water and spray the solution on surface foam with a spray bottle

Anti-Foam 20 is a low surface tension silicone anti-foam that has interfacial properties that when combined with its lack of foam stabilizing properties cause the foam wall to thin and collapse.

CAUTION: CAUSES EYE IRRITATION

Notice: Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty nor any other warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use, storage or handling of this product contrary to label instructions, or under abnormal conditions, or under conditions not reasonably foreseeable to seller, and buyer assumes the risk of any such use. The risks include, but are not limited to damage to plants, crops and animals to which the material is applied, failure to control pests, damage caused by drift to other plants or crops, and personal injury.
