## December 12<sup>th</sup>, 2006 Meeting - Speaker's Biography:

Joseph Tarascio is the Regional Equipment Director, Canada for York, a Johnson Controls Company. He is responsible for the equipment sales of the Engineered Systems Product within the York brand in Canada. Joseph graduated from Ryerson Polytechnical Institute with a B.S. in Engineering Technology/Mechanical in 1982. He has been an ASHRAE member since 1983 and has served on the Toronto ASHRAE Refrigeration Committee and on HRAI ICI Task Force Group.

### Abstract:

Joseph will discuss the advantages of Variable speed drives for Centrifugal Chillers.

## Summary of November 14, 2006 Meeting

The principal speaker was Chris Snow, Manager of Service and Inspection for Enbridge Gas New Brunswick. He discussed the various venting requirements for natural gas equipment with reference to the B149 Code, examining the intent and rationale of various clauses.

Jim Morris of MacLeod and Grant also spoke briefly about new developments in the commercial and industrial aspects of natural gas equipment.

The Chapter is grateful to Selkirk Canada for sponsoring a table-top display at the meeting.

## Building Commissioning for New and Existing Buildings

You've been asking for it. Now we can bring it to you (provided we have enough interest).

ASHRAE's newest full-day seminar "**Building Commissioning for New and Existing Buildings**"

This seminar is based on ASHRAE Guideline 0-2005—The Commissioning Process.

### Abstract:

Building commissioning is a quality-focused process for enhancing the delivery of new construction projects and improving the performance of existing facilities. The process focuses on verifying and documenting that the facility and all of its systems and assemblies are planned, designed, installed, tested, operated, and maintained to meet the owner's requirements. This course, based on ASHRAE Guideline 0-2005, "The Commissioning Process," explores the application of the commissioning process to new construction and to existing facilities. More here Attendees also will learn about the benefits of commissioning, documentation requirements, issues in specifying commissioning, and the economics of commissioning. The publication, ASHRAE Guideline 0-2005, "The Commissioning Process" is included with this seminar.

### How do we do it?

ASHRAE Learning Institute is able to provide this seminar due to a grant received from the Canadian Department of Natural Resources. Canada wishes to encourage the adoption of energy efficiency and renewable energy technologies in all sectors of the Canadian economy. The Canadian government has reviewed case studies that commissioning and recommissioning are primary tools for saving energy in buildings.

This full-day seminar would normally cost \$396 per ASHRAE member and \$506 per nonmember, not to mention travel expenses. However, due to the grant from the Canadian Department of Natural Resources, we can bring it to you right here in Moncton for as low as \$150 per member and \$200 per nonmember provided we have enough people who are interested.

If you or anyone in your organization shows genuine interest in attending this seminar please let Craig Brown know at 506-855-3133 or [cbrown3@trane.com](mailto:cbrown3@trane.com) and we will get the ball rolling to bring you this seminar.

Please check future editions of the *Herring Choker* or our website [www.ashraenbpei.com](http://www.ashraenbpei.com) to see if this seminar is a go.
