Summer 2015

The Newsletter for the Professional Contractor

“QUALITY BRANDS”

This year “The Greatest Outdoor Show on Earth” runs from July 3 through to the 12th. If you catch the Official Parade, visit the Exhibition Grounds or other Official Stampede Events; keep your eyes peeled for the Queen and her Princesses. You will notice the “DE” brand emblazoned in bold orange

and its brown circle on one of the saddles. Davidson Enman was the original sponsor for the prized saddle that

Photo from the Calgary Stampede Royalty 2015 Website

was given to the reigning Stampede Queen back in 1990. The program was expanded to include a saddle awarded to the two Stampede Princesses. The three sponsors rotate their sponsorship each year between the Queen and her Princesses. We are proud to be an official “Wrangler Level” sponsor, so keep a look out for two of the best known brands of the west; the one hundred and three year old Calgary Exhibition & Stampede and the sixty seven year old Davidson Enman Lumber.

DECK THE HALLS

Did you know that we stock a 2 x 6, S. Dry, Select Fir, Tongue & Groove V Joint Decking in 12' & 16' lengths? This product has been used by many of our customers for; truck box decking, portable flooring systems as can be seen at Spruce Meadows, Exterior Ceilings such as the one at the Banff Recreation Center, or interior flooring, ceiling or feature wall application for that rustic “Western” look.

EZZE Dam

One of the biggest problems if not the biggest challenge facing wood frame builders is the leaking of water in the window pan area resulting in structural degradation and mold growth. Ezee Dam, is a window pan dam system designed to direct rain and condensation out of the window pan area towards the exterior of the of a building envelope to drain and protect the window pan area. We are not going to detail the how of it, but rather direct you to their website so you can see for yourself;

www.ezeedam.com and then direct your call to our Sales Representative to place your order with your

next Framing Package and start up selling your customers! It is the only window pan system that contributes points for LEED credits and therefore lines up with our FSC Dimension Lumber & Plywood.
