

Carpet Cleaning

Are you getting your carpets cleaned soon? We recommend the homeowner to vacuum the carpets before we come to steam clean them. We will need to park in your driveway, as we have several things to bring in to do the service. When we are cleaning your carpets, if you would like your furniture moved please let us know before we are finished cleaning the carpets. When your carpets are done being cleaned we highly recommend that the homeowner not to let their pets go on the damp carpets because sometimes they can become ill because of the damp carpets. If you're cleaning your bedrooms we recommend the homeowner have their closets done as well. If you are interested in getting your closet cleaned, please try and pick up as much items off of the floor as possible. It makes it easier for us to do our job more efficiently. It would also be a great help if you could tuck in all bed sheets around your beds this way we can reach as far back as possible with our wands.

Don't hesitate to ask us to clean your front door area rug, we highly recommend it and we promise to get all soil off before we leave. Once we have finished steam cleaning your carpets don't hesitate to ask us for our free booties. We highly suggest wearing them as the carpets will be wet for a couple of hours and in some cases can be wet for even longer depending on the volume of soil. Free estimates can be given over the phone or in person. Please give us a call today!
