December 14, 2018

NORMET CANADA AND DYNAMEK GROUP SIGN SALES REPRESENTATIVE AGREEMENT

Plans to Grow TBM Chemical Business in Canadian Tunnelling Market

Sudbury, Ontario, December 14, 2018 – Normet Canada Ltd. has signed a 5-year sales representative agreement with the Toronto area company, DynaMEK Group Ltd., as its exclusive sales representative in southern Ontario for its line of TBM Chemical products for the tunnelling industry.

Normet has worldwide coverage with its manufacturing capacity, its regional offices and its global agent and distribution network. This agreement will provide better access and support to the active southern Ontario market. Randy Ouimet, Director of Sales and Vice President of Normet Canada Ltd., is excited about the growth opportunities in the TBM sector within southern Ontario:

“DynaMEK’s significant experience in Tunnel Boring Machine design, operations and engineering support will bring Normet products to a market that is poised to host major infrastructure and transportation projects for many years to come.”

DynaMEK Group Ltd. President Glenn Mongillo believes that this agreement represents a strategic fit for both companies:

“Normet is a leading global supplier of quality and effective chemical products for the unique and challenging tunnelling industry. With a complete range of products and equipment along with many successful projects worldwide, it’s hard not to see Normet as an expert in this field. Combining DynaMEK Group’s experience in TBM design and the equipment used in ground conditioning, sealing, and grouting, with Normet’s ground treatment and chemical experience means that our TBM customers will have broad and well rounded, direct support for their TBM Tunnel projects.”

DynaMEK Group Ltd. is now the exclusive sales representative of Normet's TBM chemical products within southern Ontario, reaching across the Windsor-Ottawa corridor, south to Niagara Falls and north to Barrie. The range of products includes: TamSoil™ Foam, Anti Clay, Anti Dust, and Polymer agents, TamSeal™ Tail Sealants, TamGrease™ Main Bearing and Lube greases, and TamCEM™ Annulus Grouts.

About Normet.

Normet is a fast growing and innovative technology company offering continuous improvement to underground construction and mining processes for increased safety, productivity and profitability. Our complete technical solutions create value through saving costs and shortening process cycle times and are developed based on the welfare of people and on the care of the environment. Normet has a broad offering for underground mining and tunneling: equipment, construction chemicals, rock reinforcement products and services. Normet currently employs over 1200 business professionals and the net sales in 2017 was over 250 million euro. Normet is a Finnish company operating globally with over 50 locations in 30 countries.
