## Rainy Lake Camp

| | |
|---|---|
| Type of Structure | Concrete blocks and Wood frame. |
| Type of Foundation | Wood Beams on Concrete and Concrete blocks. |
| Exterior | Brick. |
| Roofing Material | Asphalt Shingles. |
| Interior Finishes | Painted plywood on walls, ceiling and floor. |
| Lighting | Incandescent and fluorescent. |
| Heating | Previously oil and/or wood. |
| Outhouse | plywood construction. |

## Hazardous Materials Summary

| | |
|---|---|
| Asbestos containing materials (ACM) | 14 samples collected during HBMA.  Non-friable caulking (<0.25% chrysotile asbestos) inside and outside accomodations building does not exceed guidelines. 1% asbestos by dry weight is considered to be an ACM as outlined in the Newfoundland and Labrador Asbestos Abatement Regulations. |
| | Samples included fireboard, countertop, building insulation, caulking, roofing shingle/tar and concrete block/mortar. |
| | There may be other hidden or inaccessible ACM not identified during the assessment.  If encountered, these materials should be treated as ACM or tested to verify content. |

| | |
|---|---|
| Paint Additives | 4 samples collected during the HBMA and tested for lead, mercury and PCB. |
| | Lead in Paint:  concentrations ranged from 26 mg/kg to 45 mg/kg (Interior and exterior of the cabin). |
| | Mercury in Paint:  concentrations ranged from non-detect to 0.06 mg/kg. |
| | PCB in Paint:  laboratory results were non detect. |

| | |
|---|---|
| Ozone Depleting Substances and Halocarbons | 1 freezer containing R12 refrigerant is present at the site. |
| Urea Formaldehydr Foam Insulation (UFFI) | Visual indicators suggest that UFFI were not present at the site. |
| Suspected Visible Mould Growth (SVG) | Mould growth was identified in the accomodations cabin. |
| Potential Lead Solder and Piping | None identified. |
| Mercury-Containing Thermostats | 4 Mercury containing light tubes are present within the accomodations cabin. |
| PCB Light Ballasts | None identified. |
| Treated Wood Products | Treated wood was not identified during the assessment. |
| Silica Containing Materials | Silica is expceted to be present in concrete and possibly asphalt shingles. |
| Potential Radioactive Containing Materials | 1 Smoke detector identified. |
