## RELEASE THE CONCRETE!

Davidson Enman Lumber Ltd. is proud to announce we are now Calgary's exclusive supplier of Nox-Crete form release agent and "Perfect" Form Sprayer. We will be stocking two release agents to cater to any job you need, and the absolute best form sprayer on the market.

### Nox-Crete Release Agent #10:

- Greatly minimizes surface voids
- Provides uniform, architectural grade surfaces
- Fast drying
- Reduces skin irritations and odor
- Sprays easily at temperatures down to -34°C

### Nox-Crete Chembeton

- Can be applied up to three weeks in advance of pour
- Fast drying
- Sprays easily at temperatures down to -18°C
- Economical

### Perfect Form and Concrete Sprayer

- Two filters eliminate spray tip clogging
- Heavy duty, stainless steel tank with brass wand
- Pressure able up to 116 PSI with compressed air inlet or hand pump
- Spray gun trigger valve
- Hose to trigger swivel
- Back-pack strap
- Pressure regulating, non-dripping flow control valve

Since 1956, Nox-Crete has been the premier producer of chemically active form release agents in North America. Their products have been proven to extend wood form panel life, and provide up to double the number of pours. These non-staining, no residue products are sure to meet the highest of standards, and their long term cost savings will be the perfect form release method for any job. All of these products are now available from your friends at Davidson Enman Lumber.
