*your **TRUSTED** partner in fire safety*

A large industrial manufacturing facility with various machinery, conveyor belts, and workers.

MANUFACTURING

A modern commercial kitchen with stainless steel countertops, sinks, and cooking equipment.

COMMERCIAL KITCHENS

A tall, modern skyscraper with a glass facade under a blue sky with clouds.

BUILDING FIRE ALARM & SPRINKLERS

A food processing facility with a worker in a white lab coat operating machinery.

FOOD PROCESSING

A row of red fire extinguishers in a data center or computer room.

DATA CENTERS AND COMPUTER ROOMS

PROFILE

Established in 1994, Phoenix Fire Systems is a family-built and run, full range Fire Protection Company focused on the protection and of unique and special hazard applications and fire risks.

Your trusted partner in design-driven solutions, we enable you to make an informed decision on what best serves and meet your needs. We are partnered with the leading manufacturers of fire safety equipment around the world to provide a unique and wide ranging offering to Canadian business.

Our technical support, design and engineering assistance and full service/maintenance are available for the lifespan of our product lines.

DESIGN & ENGINEERING

Our engineering team provides a full range of design and engineering services extending from simple product advice right through to detailed system design, including hydraulic flow calculations, design and engineering drawings and risk assessment. We can provide solutions for practically any fire or special hazard.

In addition, our experienced project management team provides a turnkey solution on those projects that require design, drawing submittal, installation, project management, commissioning and ongoing maintenance services.

SUPPLY & INSTALL

Our installation team is highly qualified and trained on each system we install. We can supply specialty components only, or provide turn-key solutions for every type of hazard from data centers and computer rooms to vehicle manufacturing and food processing.

In addition to standard pipe, fittings and detection, we offer specialty system components, explosion proof, stainless steel and other special hazard

solutions, for all types of conditions and applications.

We work hard to schedule and coordinate with other trades on site to minimize downtime and get the job done quickly and efficiently.

SERVICES, MAINTENANCE & TESTING

Our trained personnel service and test your equipment to confirm compliance and provide peace of mind

Testing and verification are vital in maintaining a fire protection system's ability to operate and perform as intended. Here at Phoenix Fire Systems we are able to test and verify everything from Building Fire Alarm, Sprinkler Systems and Clean Agent Systems, to foam concentrate compliance and audibility audits. Our comprehensive testing services are sought after within the Fire Protection Industry. In addition, we provide regular inspection services for all types of Fire Protection and Life Safety systems.

- ✓ Building Fire Alarm Testing
- ✓ Clean Agent Semi Annual Maintenance
- ✓ Carbon Dioxide System Maintenance
- ✓ Interconnected Smoke Alarms Testing
- ✓ Exit/Emergency Lighting
- ✓ Extinguisher/Fire Hose Inspections
- ✓ Sprinkler System Maintenance
- ✓ Foam System Maintenance
- ✓ Hydrostatic Pressure Testing

Other services include:

- ✓ System Recharging for all types of Systems
- ✓ Integrity Testing
- ✓ Training
- ✓ De-Commissioning
- ✓ System expansions and redesigns

Our Commitment

We are dedicated to providing our clients with **peace of mind**, knowing that our systems are protecting their mission-critical equipment and data.
