

# PROLINES

December 2014

The Newsletter for the Professional Builder

## WELCOME TO THE NEW PROLINES

Welcome to the first “electronic only” copy of Prolines. Due to our recent move to no longer mail out Prolines with a monthly statement we have adopted an electronic distribution process to achieve a desired objective. We are now emailing so many monthly statements that including a copy of the most recent Prolines mailer with paper statements provided little coverage, additionally many of the editions may not have gotten into the right hands through this method of distribution, and there is always the environmental concern for paper waste. If you are on the electronic mailer list and wish to opt out it is as simple as clicking this [link](#) put “unsubscribe” in the subject line and send. However if there are individuals in your organization you think should be included in our Prolines Mailer List; just email your sales representative to include their names and email address.

## HOLD YOUR HORSES

Once again, the biggest and the best of all wall calendars have arrived to be distributed to the offices, shops, job trailers and other locations of our valued customers and friends. This year's edition of the annual D&E Calendar, features the extra large size of 30” x 40”, or 76 x 102 centimeters. The large print makes it so easy to read and features a daily numbered count back of the 2015 year, from 365 on the first of January, back down to number one on December 31. There is ample room provided to conveniently write down notes, deadlines or other important information on the monthly tear away sheets. The art work features a beautifully styled western theme, entitled “Safety First” by Alberta artist Ruth Moore. Ruth's artistic talents extend to equine, and western lifestyles, and can be found at; [www.ruthmoore.fineartstudioonline.com](http://www.ruthmoore.fineartstudioonline.com). The selection of this year's calendar was inspired the continuing need to address the ever changing safety issues in the workplace. The cowpoke is really undertaking a job site safety analysis or hazard identification process. However, it is not just his own safety that he is concerned about, but also the safety of his horse, which he is dependent on for his livelihood. Your fellow workers are today's “working horse” and so the concern for safety extends to all in the workplace not just the owner, supervisor; or in this case, the cowboy.

If you are not on the list to receive one of our wall calendars, and would like to get in line, then get ONLINE for one of the few remaining extras. You can also have your company name placed on the delivery list for next year, so safely get on your horse and contact: [promotions@delumber.com](mailto:promotions@delumber.com)

## OPERATING WITH EXCELLENCE

In 1977 Davidson Enman Lumber Ltd. introduced a fault free, safe driving, material handling and safety awareness incentive plan for the operators of our fleet of delivery vehicles. Our Safe DE Team has also determined that in regards to the number and variety of hazards our fleet operators face, it is easily our most dangerous job. It is very important that we have capable, safe and courteous drivers who operate fault free and keep our delivery fleet moving with minimum of down time. If you or your staff encounter a Davidson Enman employee who is not operating a vehicle in a safe and courteous manner, please contact our Safety Director; Jim MacNeil [safetydirector@delumber.com](mailto:safetydirector@delumber.com). In 2014, six of our driver/operators were able to meet the demanding standards of safe driving/operating and material handling excellence. The successful operators are; **Doug Gatehouse**, from Cochrane Distribution; **Sean Hope**, **Jim Patmore**, **Dion Rioux**, **Jordan Thompson** from the Calgary Yard and from our Truss Division; **Robert Scott**. Management would like to extend our congratulations and thanks to these valuable members of the Davidson Enman Logistics Team!

## SIZE MATTERS

The manufacturer of the line of friction fit fiberglass insulation that we carry has changed the quantity of batts per bag of insulation and therefore the square foot coverage of each bag. The old and new sizes are listed for comparison The new packaging will be available as our stock is replaced.

OLD	NEW
R12-15 18/pcs 88 sq. ft.	20/pcs 98 sq. ft.
R12-23 18 pcs 135 sq. ft.	20/pcs 150 sq. ft.
R20-15 10/pcs 49 sq. ft.	16 pcs 78 sq. ft.
R20 23 10/pcs 75 sq. ft.	16 pcs 120 sq. ft.
